THE EDGE®

Supported Operating System
➔ Windows 10
➔ Windows 8 / 8.1
➔ Windows 7*
  ◆ *Integrated email not supported.
➔ Windows Server 2008 R2
➔ Windows Server 2012 R2

•**Processor**	Quad-core x64 architecture 2 GHz or higher (e.g. AMD Athlon x4 or Intel i5)
•**RAM**	8 GB on workstation 16 GB on server
•**Disk**	100 GB on workstation 500 GB on server
•**Display**	POS requires 1280x720 or higher Back office functions require 1280x1024 or higher
•**Internet**	Not strictly required for single stores, but highly recommended. Some services will not be available without it. Required for multi-store
•**Backup**	Reliable daily backup required (offsite and/or cloud-based recommended)

•**Optional Peripherals**
Depending on which optional peripherals you want to use, please ensure that you have enough free ports of the appropriate type:

•**Barcode Scanner**-Bar code scanners require a USB port.Note: If you buy your barcode scanner from us, it will come pre-programmed and we also stock a limited number of loaner units in case you need to send yours in for Service.

•**Tag Printer**-Requires a USB or LPT port. Note: Tag printers should NOT be networked.Note: If you buy your tag printer from us, it will come pre-programmed and we also stock a limited number of loaner units in case you need to send yours in for service.

•**Page printer-**For receipts, reports, and general printing requirements, USB ports are most common. Page printers are commonly shared on a network.We do not sell page printers, but there are numerous suitable laser printers in the marketplace. The most important considerations for you should be:
The placement of the printer in your cabinetry with respect to accessibility of the paper input and output trays.
Whether you want to print receipts and reports in black only, or in color.
The time to print the first page from a cold start is especially important.
Not all page printers are suitable for use with The Edge, or in a retail environment.
Printers intended primarily for printing photos are generally not suitable.
Printers that are intended for personal use are generally unsuitable. Printers intended for business or "workgroup" use are preferred.
Printers with "PostScript" drivers have been found to perform poorly, especially when printing receipts and repair envelopes. Printers with "PCL" drivers are preferred.

•**USB Hub**- If you exceed the number of USB ports on your computer, you can get a USB Hub to increase the number of available ports.
